

We Create *Cultures* That Mean *Business.*

Accountability Workshop

These intensive one-day sessions introduce a personal, proactive and powerful new definition of Accountability. Your team will leave wanting to TAKE accountability, not just be accountable. These are delivered both on-site and virtually.

Why Accountability Matters

When your team is clear about the most important results that must be achieved, how they impact the goals, and regularly bring a mindset of proactively taking accountability, your KPIs significantly improve. Period. What would happen in your organization if everyone learned to keep asking “What Else Can I Do to Help Achieve our Results?”

The Workshop Experience

This workshop helps your team take personal accountability to close performance gaps related to overall results. Based on a common language and framework, employees will take more individual ownership of end goals. We base everything on simple tools to operationalize accountability, as well as focused and easy-to-implement feedback models. All-in, you get a team where everyone can own the desired end state.

Praise For The Workshop

“The accountability methodology we learned from Culture Partners is driving the fastest organizational and leadership alignment I have ever seen in my career. It is impressive how quickly even a global company can agree on the key changes it must make if it is going to radically improve its performance.”

– Carla Cooper
CEO Daymon Worldwide

The Benefits

Our Accountability Workshop clients have seen 12% return on investment, 506 days without time lost to injury, and 15% boost in sales.

Upon completing the Accountability Workshop, you'll have the opportunity to convert to a three-year engagement, as most of our clients do. This deeper process with frequent touchpoints helps foster accountability and growth at all employee levels.

Build an Impactful Culture
